Create The Look with Roof Tiles

Visually your roof contributes significantly to the overall look of your home as around 30% of your home's facade is made up of the roof. Choosing the right roof tiles is important and a great way to add beauty, character and value to your home. To help in choosing the right tile, consider the following:

What Roof Style Are You?

Like many things, the finish of a product can make all the difference. It's the same for roofing. If it is a more contemporary, minimalist look you are trying to create, use Horizon tiles with A-line Ridging.

CLASSIC

Traditional tiles with lapped ridging.

CONTEMPORARY

Sleek tiles with a streamlined ridge system.

Colour & Finish

monierprime has a diverse and modern palette of colours and finishes to choose from. From light neutrals to sophisticated dark tones and matte through to glazed finishes.

Light neutrals

Dark tones

Matte finishes

Glazed finishes

Sarking

You only get one chance to install sarking and that is when you install a new roof. At monierprime we believe the benefits of sarking far outweigh the incremental cost of the product. Sarking is a flexible membrane that is laid under the roof battens during roof installation, it helps protect your home from the elements and improves the overall insulation of the roof.

Selecting a Profile

Profile refers to the roof tile's shape and design. It is what gives your roof its distinct and unique character. monierprime offers a large range of profiles, from sleek, contemporary, flat profiles, to the more classic styles. When choosing a profile it is important to consider the pitch of the roof.

CONCRETE PROFILES

CONTEMPORARY

HORIZON

The ultimate flat concrete roof tile, designed to deliver a streamlined roof that integrates seamlessly with current trends.

CONTEMPORARY

STIRLING

With its slate-like finish, the Stirling roof tile is the ideal choice for the discerning home owner.

CLASSIC

HACIENDA

Hacienda is a versatile roof tile that combines traditional good looks with exceptional product performance.

TERRACOTTA PROFILES

CONTEMPORARY

NULLARBOR

The Nullarbor roof tile creates a streamlined, sleek and sophisticated roof line. *Streamline ridges are not available on this profile.

CLASSIC

MARSEILLE

Classic French style from a tile that works with both traditional and contemporary architecture.

CLASSIC

NOUVEAU

Nouveau is a fusion of classic and contemporary looks with a satin finish.

The Benefits of Tiles

Will not rust, warp or corrode

monierprime roof tiles will never rust, warp or corrode, a problem with other roofing materials.

Salt safe

monierprime roof tiles are ideal for coastal locations that endure the wind, spray and salt of the ocean. All monierprime roof tiles are salt safe and will not corrode.

Provide acoustic insulation

monierprime roof tiles have a sound reduction potential of ~ 30db. That is twice the sound deadening performance of other thinner metal roofing materials, assisting to keep unwanted noise out.

Provide thermal insulation

monierprime roof tiles help to keep the cold out and the heat in, in the winter...and the heat out and the cool in, in the summer. Saving you and the environment through energy savings.

Tank water safe

Roof tiles' raw materials are non-toxic, so the water that runs off a tiled roof is potable. However, factors like atmospheric fallout need to be considered.

Impervious to frost and ice

monierprime roof tiles are impervious to the effects of frost and ice and will never warp or crack, no matter how cold it gets outside.

Terracotta's additional appeal

**Colour
Never
Fades**

Monier Terracotta tiles are a sustainable product of lasting beauty. The colour never fades as it is baked onto the surface of the natural clay, giving it qualities like no other roofing material. This is backed by the Monier Terracotta Colour and Performance Guarantee.

Important Information

Concrete tiles are created from controlled formulation of raw materials extruded under high pressure to achieve the tile's strength and resistance to weather. The colour applied and/or incorporated into the body is purely decorative. When first installed concrete tiles may exhibit some discolouration caused by the migration of naturally occurring concrete salts to the surface of the tile. This is known as efflorescence and is usually temporary. All roofs are expected to progressively return to an even matt appearance after time.

Terracotta tiles are created by firing natural clay in high temperatures. Glazed tiles have ceramic materials and oxides added to the body or surface of the tile. Each tile may vary in shades. The most attractive roofs are created by blending these shades throughout the roof during installation.

All tiles will contain small blemishes. During transportation and installation other blemishes such as scuffing and chip marks may occur. These will not detract from the weather proofing performance of the tile and are not considered a product fault. monierprime endeavour to supply tiles similar or as near to displayed product, however no responsibility will be accepted for any variations. When installing Horizon Roof Tiles please contact monierprime for sarking requirements.

MONIER SOLARtile

INTEGRATED MODULAR PHOTOVOLTAIC SYSTEM

Monier's new SOLARtile use the latest PV technology to convert sunlight into electricity.

It works in much the same way as a conventional 'bolt-on' Photo Voltaic panel, but there's one very important difference, and that is its integrated design.

Developed specifically to work seamlessly with Monier's range of flat profiled concrete tiles, Monier's SOLARtile is a truly innovative product that delivers a 'green energy solution' with good design and aesthetic appeal at its core.

- **Integrated design - improved streetscape**
- **25 year product performance guarantee**
- **Modular system - design flexibility**
